1. Specifications

Description: Philips SD card

Capacity: 8GB – 128GB

Bus interface: UHS-I

Speed class: Class 10

UHS speed class: U1

Video speed class: V10

Read speed: Up to 80MB/s (based on internal testing)

2. How to use

1. Connect the SD card to your host device.
2. If you wish to connect to a USB port of a computer, please use a USB adapter (not included in the package).

How to disconnect the SD card

When you are copying files to the SD card, it is possible that the data copying process has not been fully completed. In order to be sure that you have finished the process, it is recommended to safely disconnect the SD card by following the below instructions.

• Windows XP and higher:

1. Go to “This PC”.
2. Right click the SD card.
3. Select “Eject”.
4. After a message of “Safe to Remove the Hardware” pops up, remove the SD card from your computer.

• Mac OS 9.0 and higher:

1. Drag the SD card’s icon to the “Trash”.
2. After receiving a confirmation that the SD card is in standby mode, remove the SD card from your computer.

- Other devices: Please check the user manual of your device on how to safely disconnect the microSD card.
- If you do not properly disconnect the SD card from your device, the files saved might get corrupted or cause damages to the SD card.

How to format the SD card

Formatting the SD card can be helpful in the following situations:

- a. If you want to erase the files on the SD card, simply deleting the files does not completely delete them. There might be some leftover data. Formatting is a more comprehensive way of emptying the SD card.
- b. In case your device does not recognize the SD card or you receive an error message such as “Unsupported File System”.

In case you wish to format the SD card, please follow the below instructions.

- PC:

1. Go to “This PC”.
2. Right click the SD card.
3. Select “Format...”.
4. Select the file system you need, and then select “Start”.

- Please note that formatting the SD card will erase all data on the SD card and the data cannot be restored.

Compatibility

Please check the maximum capacity your host device, for example your camera, phone, tablet, TV, voice recorder and printer, is able to support.

Please check the format of your host device.

- If your host device has the format of SDXC, it can work with the formats of SDXC and SDHC memory cards.
- If your host device has the format of SDHC, it only works with the formats of SDHC memory cards.

Supports

- Windows® XP and higher
- Mac OS 9.0 and higher
- Linux 2.4.0 and higher

3. Notes

Do not place the SD card at locations that are:

- extremely hot or cold
- vibrating
- exposed to corrosive gases
- dusty or dirty
- very humid
- exposed to direct sunlight

Power consumption in standby mode: < 100 mA.

Our product warranty is limited only to the SD card itself, when used normally in accordance with these operating instructions in the specified or recommended system environment.

Services provided by the company, such as user support, are also subject to these restrictions.

The company cannot accept liability for damage or loss resulting from the use of this unit, or for any claim from a third party.

4. Environmental information

All unnecessary packaging has been omitted. We have tried to make the packaging easy to separate into two materials: cardboard (hang card) and plastic (tray holding the USB flash drive in position). The whole product packaging consists of materials which can be recycled and reused if disassembled by a specialized company. Please observe the local regulations regarding the disposal of packaging materials and old equipment.

This symbol on packaging signifies that the producer has made a financial contribution towards the recovery and recycling of packaging.

Disposal of your old product

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.

This symbol on a product means that the product is covered by European Directive 2012/19/EU and cannot be disposed of with normal household waste. We strongly advise you to take your product to an official collection point. Inform yourself about the local separate collection system for electrical and electronic products. Follow local rules and never dispose of the product with normal household waste. Correct disposal of old products helps prevent negative consequences for the environment and human health.

5. Compliance

Compliance with CE

This symbol means that the product is compliant with health, safety, and environmental protection standards for products sold within the European Economic Area. The product is manufactured in accordance with provisions imposed by EMC (Electromagnetic Compatibility) and RoHS (Restriction of Hazardous Substances) Directives. To minimize the environmental impact and take more responsibility to the earth we live, the product complies with the restriction of SVHC (Substances of Very High Concern) and REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals) regulated by the European Union.

Compliance with FCC

The device complies with the FCC rules, Part 15. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit that is different from that to which the receiver is connected. Consult the dealer or an experienced radio or television technician for help.

Canada:

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Social Compliance

The manufacturer of this product is certified with RBA standard (Responsible Business Alliance). This means that this product is designed and produced in the community that adheres to ethical sustainability and endeavors to protect the health, safety, and rights of the employees and environment in which they operate. The producer follows the rules based, among others, on the United Nations' International Labor Organization (ILO) 'code of conduct' and the Human Rights Declaration. The main principles affiliated with the social compliance include:

- no discrimination
- no child labor
- legal minimum wages
- protection on the number of hours people have to work
- no forced labor
- safe working environment
- measures against corruption

Having the Philips product manufactured in compliance with social sustainability values, where high standards are required of the supplier, helps contribute to the people involved in production of the product being treated fair, with dignity and respect.
